UC-One Upgrade Summary

SUMMARY

- Like the previously deployed commercial market versions, each of the UC-One Carrier Desktop and Connect clients support all Cisco BroadCloud market regions including from a single client using the region pulldown menu from the login screen.

- This upgrade applies to **UC-One Carrier Desktop** (Win/Mac/S4B) and **UC-One Carrier Connect** Devices (iOS/Android).

- If you are not actively using **UC-One Carrier Desktop** Application, read **UC-One FAQ** for more information and the most common questions asked by potential customers.

UC-One Upgrade Downloads

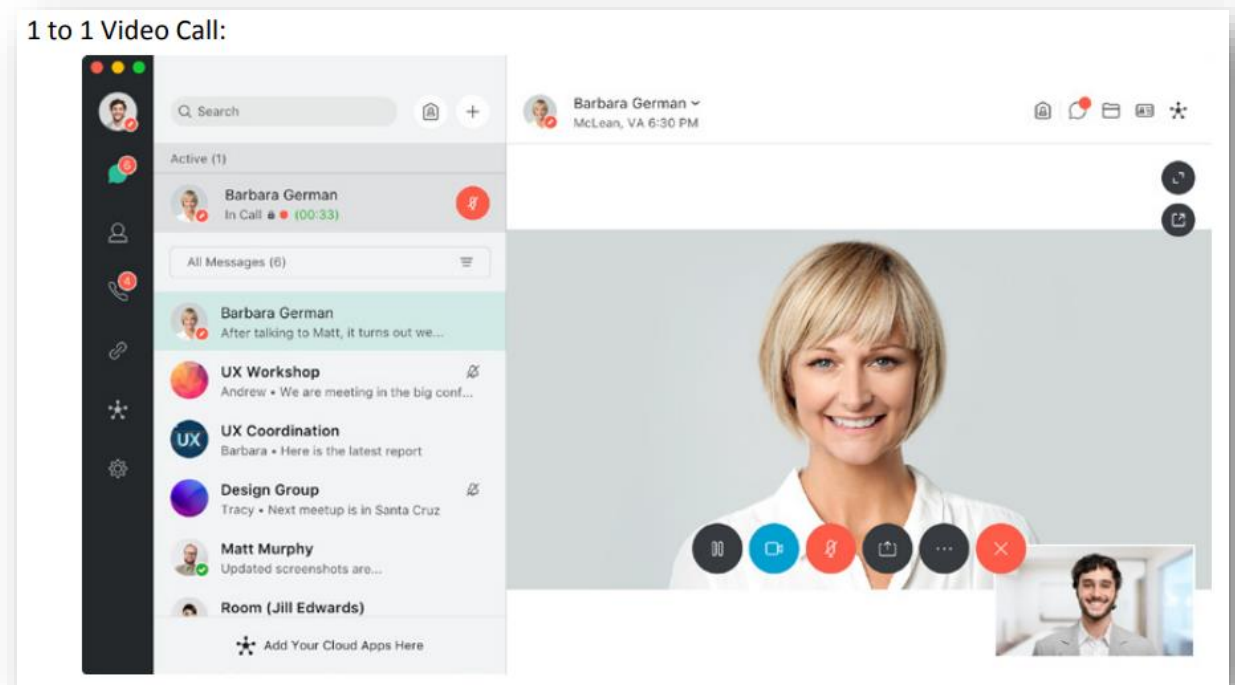

Download Updates

- Updates will need to be made on both the Desktop Software and applicable Mobile Software

- New version of desktop software will remove older versions

- Select BroadCloud Carrier Connect in the Mobile Software section

UC-One Upgrade Summary
